EDUARDO PERALTA
BACKEND DEVELOPER

ABOUT

I'm a software developer with over 7 years of experience, specializing in backend systems for the financial and banking industry. I focus on process automation, database optimization, and performance-oriented solutions for high-demand environments.

I have led teams and participated in projects covering scalable architecture, microservices, CI/CD automation, and mobile development. My passion lies in creating efficient and impactful systems, always seeking innovation in the software field.

I speak English fluently and have basic knowledge of Portuguese.

Location: Fernando de la Mora - Paraguay.

TECH SKILLS

- Backend: PHP (Laravel), Node.js, Java (Spring Boot), PYTHON (DJANGO).
- Frontend: React.js, Angular
- Bases de Datos: PostgreSQL, MySQL, Oracle
- DevOps: Docker, Kubernetes, Jenkins, Git
- Methodologies: Agile, Scrum

EDUCACION

- **INGENIERIA INFORMATICA – Universidad del Cono Sur de las Américas**
- **Bachillerato Tecnico Mecatronico – Colegio Dr. Fernando de la Mora (2014–2017)**

WORK EXPERIENCE

PYTHON Developer – TECHTIVA

2025 – Present| Spa

- I develop automations using Python to generate pythonparts components, which are construction pieces, for use in Allplan. These automations are requested by clients, who provide the necessary specifications.

Tech Lead

2024 – 2025 | Paraguay

- I led the full development cycle of enterprise applications for collection management.
- I automated deployments with Jenkins, reducing manual errors by 40%.
- I supervised code quality and repository management using GitBucket.
- I assigned and coordinated team tasks, ensuring timely delivery and deployment of features.

Senior Backend Developer – Roshka

2024 | Paraguay

- Reengineering of microservices for banking products using Java (Spring Boot).
- Collaboration with Product Owners and QA to improve delivery processes.
Deployment of Docker and Kubernetes for container environments.

ANALYST DEVELOPER – SIGESA

2023 – 2024 | Paraguay

- I developed web applications with PHP/Laravel and PostgreSQL/Oracle integration.
- I optimized query performance by 35% in high-traffic modules.
- I gathered business requirements and ensured delivery was aligned with the company's objectives.

Software Instructor – Espacios del Ser S.A.

2019 – 2022 | Paraguay

– I taught programming to children and teenagers using Java, Scratch, C#, and Python.
– I designed educational content for robotics with LEGO Mindstorms, Arduino, and VEX.

Full-Stack Developer – CAST S.R.L.

2022 – 2023 | Paraguay

- I developed mobile applications using Angular and native Android (Java).
- I managed PostgreSQL, Oracle, and MySQL databases, optimizing for large data volumes.
